AI-GATE – Governance - Adoption - Trust - Enablement

AI governance that turns your requirements into actionable measures.

Method, platform and consulting for structured, beneficial AI governance: assess use cases, identify gaps, derive measures, steer implementation.

Implement, don't just document.

AI activity turns into steerable AI governance.

Why this is relevant to you

AI enters the organisation through business units, SaaS products, existing software and employees.
Without structured governance processes, the result is isolated case-by-case decisions, shadow AI and lengthy coordination, and the all-important traceability is missing.

- Which use cases are permitted, sensible and economically viable?
- Which requirements apply to data protection, security, legal, finance and technology?
- Which measures are missing before approval?
- How do you keep maturity, risk and implementation in view?

How you benefit

1 Method
10 topic areas with 10 guiding questions each

- Define TO-BE / AS-IS and relevance per topic area
- Make gaps visible
- Derive quick wins and structural measures
- Derive a prioritised roadmap for the roll-out

2 Product
Assess and steer use cases

- Assess against defined requirements
- Show compliance gaps for each dimension
- Receive concrete proposals for measures to reach the target
- Connect IT, compliance and reporting structures

3 Service
Introduce AI governance

- Determine the governance target picture and the current position
- Facilitate between AI, IT, security, data protection and the business domain
- Clarify roles, responsibilities and decision paths
- Steer introduction and change in a targeted way

Assessment and integration dimensions

hpc one AI-GATE assesses against defined organisational and compliance requirements.
It makes gaps visible and derives concrete measures.

AI policy	Change Mgmt	GDPR	AI Act
NIS2	ISO 9001	ISO 27001	ISO 42001
CSRD	ITSM / TBM	Finance / TCO	Technical requirements

Requirement → Assessment → Gap → Measure → Steering

From requirements to measures to steerable AI governance.

Book your on-site appointment with a live demonstration.

30 mins Executive demo as an overview.

60 mins Specialist session on the method, the assessment of use cases and the governance kick-off.
